Built to move insight into action. Fast.

Adopt JMP® Live to equip everybody in your organization with access to secure, live analytics – reducing investigation time, breaking down silos to improve collaboration, and increasing operational agility.

Why it matters

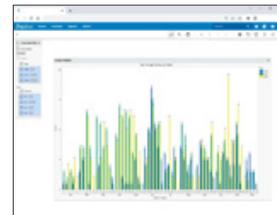

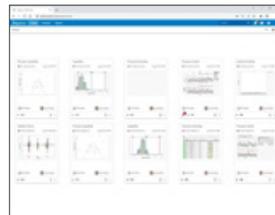

- Static reports delay decisions and hide root causes.
- Disconnected teams waste time on redundant analysis.
- Quality issues and compliance gaps create rework and audit pain.

What JMP Live delivers

- Live dashboards to uncover issues early.
- Interactive visual analysis to pinpoint root causes.
- Unified data sources.
- Secure sharing with record history built in.
- Cross-team visibility that speeds collaboration.

The business value

- Engineers: Resolve problems faster with repeatable analysis.
- Managers: Track accountability, prevent silos.
- Leaders: Make agile, data-backed decisions and reduce risk.

Role

Challenge

Executives

No real-time insight.

R&D

Siloed experimentation.

Quality

Inconsistent reporting, audit risk, no systematic deviation handling.

JMP Live solution

Live dashboards and KPI tracking.

Centralized, reusable analysis and knowledge conservation.

Standardized reporting at scale, control chart triaging with assignment.

Outcome

Better insights, anytime. Faster strategic decisions.

Accelerated innovation, better collaboration.

Quicker audits, minimize downtimes, transparent deviation handling
